SUMMARY

Highly skilled UI/UX Designer and Front-End Developer with a proven track record of crafting exceptional user experiences across web and mobile platforms. Currently serving as Design System Designer at PETRONAS Digital, I maintain the Emerald HUE design systems while bridging the gap between design and code.

I specialize in **Figma Variables** and **design tokens**, building automated pipelines that transform design decisions into platform-specific code. My systems eliminate manual handoffs and reduce inconsistencies by 90%. With expertise spanning from design systems to front-end development, I integrate creative design principles with technical expertise to deliver visually appealing and intuitive interfaces. I actively explore and integrate AI tools to streamline design processes and enhance team efficiency.

EXPERIENCE

Design System Designer • PETRONAS Digital

Aug 2023 - Present

- Develop and maintain PETRONAS Emerald HUE design systems, ensuring cohesive user experience across all digital platforms.
- Built automated design token pipeline using Figma Variables, Style Dictionary, and CI/CD integration with 1000+ semantic tokens.
- Created accessibility mode variants including dark mode high contrast mode and color blind mode, reducing design-to-code sync time by 85%.
- Developed 50+ token-driven React components achieving 100% Figma-code consistency.
- Collaborate with cross-functional teams to implement and refine design components, bridging gap between design and code.
- Integrate AI tools including Claude Code, GitHub Copilot, and Figma Dev Mode MCP Server to streamline design processes and enhance efficiency.
- Conduct workshops and training sessions on design systems best practices, enhancing team productivity and cohesion.
- Reduced platform inconsistencies by 90% through systematic token implementation.
- Decreased design QA time by 70% through automated consistency checks.
- Achieved 60% faster component development through token-driven architecture.

Senior Design Consultant • Seetru Studio

Mar 2023 - Aug 2023

- Enhanced real-time upstream dashboard for PETRONAS, a leading oil and gas company in Malaysia, resulting in 25% increase in user engagement.
- Developed official website and visual marketing strategies for Kuala Lumpur Stock Exchange new product launch Bursa Gold Dinar, contributing to successful campaign.

Senior UI/UX Designer • Orius Digital

Jan 2023 - Mar 2023

- Designed intuitive and seamless onboarding flow for Maybank new sustainability credit card, integrating carbon tracking features.
- Conducted thorough user research and provided UX consultation to enhance overall user experience and usability.

Freelance UI/UX Designer • 99designs

Jul 2022 - Aug 2023

- Redesigned and enhanced UX of Wise SWIFT code checker tools website, leading to 30% increase in user traffic.
- Achieved multiple wins in landing page design contests, demonstrating strong design proficiency and creativity.

Web Developer • Axiata Digital & Analytics

Dec 2019 - Jun 2022

- Designed and developed Axiata Integrated Annual Report 2019 website using modern web technologies.
- Created digital ads, newsletters, web banners, and promotional pages for Boost e-Wallet and Axiata Group, enhancing brand visibility.
- Successfully pitched and won Mahsing Group website redesign project.

Front-End Designer • iCar Asia

Sept 2016 – Dec 2019

- Led front-end development and UI/UX design for carlist.my, Malaysia top automotive classified site.
- Collaborated with regional teams to update mobil123.com (Indonesia) and one2car.com (Thailand).
- Self-learned ReactJS and developed iCarBid platform, demonstrating commitment to continuous learning.

Head of Design • MyBazar Malaysia

Mar 2016 - Sept 2016

- Spearheaded design efforts for global social selling marketplace startup, leading to cohesive brand identity.
- Designed in-app graphics promotional assets and daily content, enhancing user engagement.

Digital Marketing Specialist • Packet One Networks

Nov 2015 - Mar 2016

- Updated P1 web portal and improved on-page SEO, increasing organic traffic by 20%.
- Developed Webe Community crowd-backing platform in collaboration with vendors.

Web Designer • Astro Radio

Feb 2010 - Nov 2015

- Updated and enhanced user experience of hitz.fm, ERA fm, and Sinar FM websites.
- Successfully rebuilt 10 radio station websites from scratch using Kentico CMS within 20 days after major hack.

Web Designer • Digital Five

Dec 2008 - Feb 2010

- Updated and maintained websites for LiteFM and THR Gegar, improving user interface and functionality.
- Redesigned official website for Digital Five, modernizing appearance and improving user experience.

New Media Designer • MotionWorks

Sept 2006 - Sept 2008

- Designed and developed websites for banking, corporate finance, and government institutions.
- Contributed to new client pitches and worked on interactive projects for high-profile clients.

EDUCATION**Bachelor of Multimedia (Honours) Digital Media**

Multimedia University, Cyberjaya, Malaysia

2000 - 2006

SPM (10 Aggregates)

MRSM Serting, Negeri Sembilan, Malaysia

1998 - 1999

TECHNICAL SKILLS

Design Systems & Tokens

Figma Variables, Design Tokens, Style Dictionary, Token Architecture, Semantic Token Hierarchies, Variable Scoping, Accessibility Modes, Multi-brand Theming

Front-End Development

HTML5, CSS3, JavaScript ES6+, TypeScript, ReactJS, Next.js, Vue, Web Components, PHP, JSON, YAML

CSS & Styling

TailwindCSS, Bootstrap, SASS, SCSS, CSS-in-JS, CSS Preprocessors, Responsive Design, Mobile-First Design

Design Tools

Figma, Adobe XD, Sketch, Framer, Zeplin, Adobe Photoshop, Adobe Illustrator

Development Tools

VSCode, GitHub, Git, Chrome DevTools, Terminal, Webpack, Vite, npm, yarn, Storybook

Component Libraries

React Components, Vue Components, Web Components, TypeScript Prop Interfaces, Component Documentation, Figma-to-Code Sync

Version Control & CI/CD

Git, GitHub, GitHub Actions, Automated Deployment, Semantic Versioning, Changelog Automation

Accessibility

WCAG 2.2 AA/AAA Compliance, ARIA Patterns, Semantic HTML, Keyboard Navigation, Focus Management, Color Contrast, Screen Reader Testing

AI Tools

Claude Code, ChatGPT, GitHub Copilot, Figma Dev Mode MCP Server, Google Gemini, Microsoft Copilot, Midjourney, DALL-E

UX & Research

User Research, Usability Testing, Wireframing, Prototyping, User Flows, Information Architecture, Personas, Journey Mapping

KEY ACHIEVEMENTS

Multi-Platform Design System Scaling • 2025

Deployed design tokens across 4 platforms including web, iOS, Android, and React Native, achieving 45% faster time-to-market for new features, enabling simultaneous multi-platform releases, and reducing maintenance overhead.

Design Tokens Implementation • 2024

Built enterprise-scale design token architecture with 1000+ semantic tokens, reducing design-to-code sync time by 85%, achieving 100% Figma-code parity across 50+ components, enabling instant theme switching between light/dark modes and accessibility variants, reducing platform inconsistencies by 90%, and decreasing design QA time by 70%.

Accessibility Certified Design System • 2024

Part of the design team behind Emerald HUE, the World's first WCAG 2.2 certified Design System that complies with global accessibility standards.

Design Leaders Meetup by Figma and PETRONAS • 2023

Helped facilitate this premier design gathering, connecting 100+ leaders and design experts from top companies and industries.

MindShuffler Chrome Extension • 2023

Launched Chrome Extension for random quotes built with ChatGPT assistance, enhancing user engagement and providing seamless user experience.

Official Honoree 17th Annual Webby Awards • 2013

Recognized in Radio and Podcasts category for work on Astro Radio websites.

Top 10 Kentico Website • 2012

Developed 10 Astro Radio websites in less than 20 working days using Kentico CMS.

Web Design Showcase • 2006

Blog design featured on CSS Mania, CSS Reboot, Web Standard Malaysia, The Daily Slurps, and Digital Malaya Project.
